Right-Angle Shrink Bundling System

Production Speeds to 40 cycles/min with minimal change over

MARKETS SERVED:

Food/Dairy Products
- Cartons
- Ice Cream Products
- Jellies/Jams
- Peanut Butter
- Oils & Salad Dressings
- Bottles

Beverages
- Water
- Juices
- Milk
- Carbonated Beverages
- Sports Drinks

Industrial Products
- Egg cartons
- Pizza boxes

Different shapes and sizes can be packaged on our equipment.
Single and double-stacked products ARE POSSIBLE!

Samples of actual products run on APM Machinery equipment

MADE IN THE USA
Why should YOU buy from American Packaging Machinery?

• Every machine component is designed with longevity, reliability and a minimum of operator involvement as its top priorities. To assure our machinery remains consistent from design to assembly, all engineering and manufacturing is done in-house.

• Heavy-duty welded tubular steel frame provides a solid base to absorb and deflect all vibration. A stainless steel frame is also an available option!

• Product handling and transfer aides are also designed in-house to provide gentle handling for each specific application.

• All profiles are stored in the HMI, along with all adjustments listed; providing fast, accurate change order for any skill level.

• Solid, hardened steel: One piece seal bar fully coated provides long-life with minimal maintenance.

• Our systems are designed for open sides, natural film enclosure OR positive side seal devices for complete film enclosure.

• We are able to meet Category 3 and 4 safety protocol.

• Our electronic motion controls eliminates many parts; providing reliable service with less maintenance.

• The APM shrink tunnel design consists of the heat source, blowers and motors all mounted at the bottom of the chamber. This provides immediate access to parts for maintenance when necessary.

• The five-inch thick mineral block insulated tunnel chamber provides reduced heat loss and maintains operator safety.

• Intuitive Operator Controls allow for easy setup and change over!
