MS Series Shrink Systems Side Seal and Trim

Production speeds to 175 wraps/min
with minimal change over

Design features include:

- Fully integrated systems
- Fully automatic with custom product handling
- 98% line efficiency
- 30% less energy used
- Electronic controls

MADE IN THE USA

SYSTEMS AVAILABLE:

MS1-22I-INTERMITTENT MOTION

- * Extremely flexible
- * Small footprint
- * Low cost
- * Production speeds to 30/minute

MS1 SERIES-CONTINUOUS MOTION

- * Servo controlled seal carriage
- * Pneumatic seal frame
- * Seal bar sizes to 40" wide x 13.5" high
- * Production speeds to 70/minute

MS2 SERIES-CONTINUOUS MOTION

- * Servo controlled seal carriage
- * Servo controlled seal frame
- * Servo controlled product infeed
- * Seal bar sizes to 26" wide x 13.5" wide
- * Production speeds to 150/minute

MS3 SERIES-CONTINUOUS MOTION

- * Complete servo control
- * High speed system
- * Seal bar sizes to 26" wide x 13.5" wide
- * Production speeds to 175/minute

AVAILABLE ACCESSORIES

- * Print registration
- * PO, PE, PVC film capabilities
- * Special voltages
- * UL, CUL, CE build standards
- * Built to customer specifications
- * Wash down stainless steel construction
- * Vertical cross seal frame

Green Machine SS available

Custom product infeeds

Film holder with two positions

Multiple connecting points for seal frame and carriage provides support

Why should *YOU* buy from American Packaging Machinery?

WE SHRINK YOUR PACKAGING COSTS!

- *Every machine component is designed with longevity, reliability and a minimum of operator involvement as its top priorities. To assure our machinery remains consistent from design to assembly, all engineering and manufacturing is done in-house.
- *Heavy-duty welded tubular steel frame provides a solid base to absorb and deflect *all* vibration. A stainless steel frame is also an available option!
- *Product handling and transfer aides are also designed in-house to provide gentle handling for each specific application
- *All profiles are stored in the HMI, along with all adjustments listed; providing fast, accurate change over for any skill level
- *Solid, hardened steel: One piece seal bar fully coated provides long-life with minimal maintenance
- *Our systems are designed for open sides, natural film enclosure OR positive side seal devices for complete film enclosure.
- *We are able to meet Category 3 and 4 safety protocol
- *Our electronic motion controls eliminates many parts; providing reliable service with less maintenance
- *The APM shrink tunnel design consists of the heat source, blowers and motors all mounted at the bottom of the chamber. This provides *immediate access* to parts for maintenance when necessary.
- *The five-inch thick mineral block insulated tunnel chamber provides reduced heat loss and maintains operator safety.
- *Intuitive Operator Controls allow for easy setup and change over!

**SERVING OUR CUSTOMERS
WITH PRIDE SINCE 1992**

**ALL EQUIPMENT IS DESIGNED
AND MANUFACTURED IN THE
USA**
